Workshop: Redistricting - Finalize District Boundary Map

Requested Action:

Conduct a workshop with FLO Analytics to set the boundaries for the final Supervisorial District Boundary map based on the 2020 Census data.

Fiscal Impact:

No fiscal impact.

Summary:

Every ten years a census is done to gather information regarding population and demographics. Following the completion of the census, jurisdictions are required to review that data and perform redistricting to ensure that boundary lines still meet state and federal requirements. Since last year was a census year, that makes this year a redistricting year. Trinity County will need to look at our Supervisorial District boundaries and have new maps drawn. Once new boundaries are drawn, we will need to review our precinct lines as well to make sure there are no changes needed to those. The Redistricting process must be completed with final maps adopted by the governing body no later than December 15, 2021.

The law requires, as part of this process that four public hearings are conducted to obtain public input as well as a webpage for public engagement. In mid October, FLO Analytics, our redistricting consultant, released our Redistricting Engagment Portal (<https://redistricting.trinitycounty.org>). Over the past two months, we have conducted the four required public hearings with the last one being conducted on last Monday. During that hearing it was requested by the Board that we hold a workshop to work with our consultant to make modifications to the proposed district boundaries in real time to come up with a final map that can be brought back for adoption by the Board at a speical meeting currently scheduled for December 9.

During public hearing number four the board reviewed and considered a proposed final map (revised draft map E) as well as 8 maps submitted by members of the public. After review of these maps, the Board requested that FLO Analytics create a map tool that would allow them to overlay the four maps they consider closest to something they would be willing to adopt. This tool (Revised Draft Map Viewer) can be accessed directly by clicking [here](#) or through our redistricting engagmenet portal (<https://redistricting.trinitycounty.org/>). The revised draft map viewer allows for easy zooming to the street level as well as over laying the district boundary line from revised draft map E and three public maps submitted by Dero Forslund on 11/27/21, Kelly Sheen on 11/24/21

and Supervisor Dan Frasier on 11/22/21. These four maps were chosen by the board during last Monday's public hearing. A user guide for this tool has been posted on our redistricting engagement portal if needed.

A static copy of the four maps being used as a start place for this workshop are attached as backup to this agenda and can also be viewed on our redistricting engagement portal.

Because of the concentration of people in specific communities they cannot be together. This has always been the case in Trinity County between Weaverville and Hayfork but not Post Mountain needs to be included in split communities. Deviation is under 10% as required but seems to be the direction of the Board at the last meeting
